1 Prebuilt Extensions

Prebuilt extensions for Fusion SaaS ERP such as unified manufacturing, job and contract management, project management and other core business solutions for varying industry types.

2 Rapid Development

The low code/no code framework ensures rapid development of custom extensions implying delivery in less than few weeks in most cases.

3 Seamless Integration

The comprehensive integration platform included in the framework is designed to accommodate diverse integration needs, including JDBC, REST API, and file-based models.

4 Framework Features

Our framework empowers businesses with collaboration tools, job management, document lifecycle management, auto-mailing and exporting to PDF/Excel.

5 Automated Workflows

Prebuilt workflow engine to customise approval processes for documents in SaaS applications.

6 Our Advantage

Benefit from our expertise across domains and technologies resulting in accelerated development, enhanced productivity, and comprehensive support for your ERP applications.

Get the best of your SaaS ERPs by extending them...
